THE FAMILY

One architecture. An open foundation.

Professional building automation

Services for homes, hospitality and businesses. The closed portal is the commercial identity.

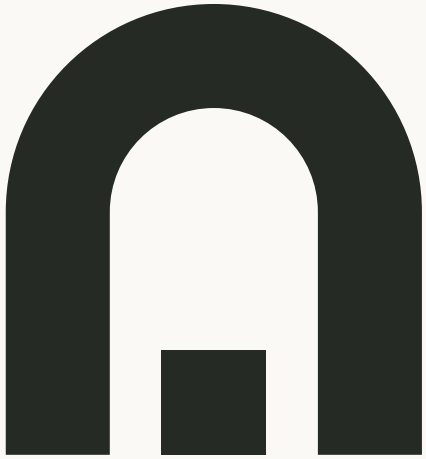
The open Home Assistant framework

Reusable components, documentation and AI-assisted setup. A side opening connects the same portal to the outside.

Use this Open shoulder pair. The two domains share construction, typography and proportions, while shape, domain and colour distinguish their roles.

CONSTRUCTION

Built from the same geometry.



CLOSED PORTAL

OPEN RIGHT SHOULDER

Canvas
64 x 64 units

Visible bounds
48 x 52 units

Concentric radii
24 / 12 units

Members and centre block
12 units

Framework opening
8 units

Base gaps
6 units

The framework mark is a subtraction from the commercial mark. It adds no dot, tile or different outline. Do not redraw either symbol.

COLOUR AND TYPE

Colour identifies. Shape distinguishes.

COM / OLIVE
#4E5E43

ORG / TERRACOTTA
#AD431F

INK
#252A24

PAPER
#FAF9F5

Manrope regular

Manrope semibold

Regular Domo, semibold Senso. Keep the domain suffix on the name baseline. Distributed SVG lettering is outlined.

On dark: paper lettering + pale sage #D6DFBC / pale terracotta #FFC4A5

LAYOUT AND SCALE

Give the mark room to work.

Compact / headers and small spaces

Remove the fine role label at small sizes; retain the symbol, name and domain. Typical desktop width: 200-240 px. Review 160-200 px responsive applications.

Full / when the role label can be read

Use approximately 520 px or wider when the role label must read as 12 px text. Do not force the full lockup into a small navigation slot.

Clear space

Keep one member width (12 source units) around visible shapes, measured from the mark rather than its artboard.

Digital symbol

Prefer 32 px; use 24 px or larger in general. The 16 px favicon is a specific small-size application.

Keep the family intact

Scale uniformly. Do not rotate, stretch, add effects, close the opening, exchange colours or revive the earlier house/tile marks.

MANUFACTURING REFERENCE

The same symbol, part of the casing.

20 x 20 mm field / 4 square centimetres

.com

.org

Actual-size vectors on a 100% print

Symbol	18.462 x 20 mm
Main members	4.615 mm
Framework opening	3.077 mm
Base gaps	2.308 mm
Trial relief / recess	0.8 mm

Use only the symbol. Union raised details into the enclosure surface or subtract the same profiles for a recess. Keep adequate wall thickness; do not treat separated shapes as a freestanding stencil.

Reference coupon: 28 x 28 x 2.4 mm backing. Raised height: 3.2 mm total. Recess leaves 1.6 mm backing. These are trial dimensions, not a model of the real enclosure.

Digital meshes were checked. Physical printing, printer-specific slicing, material and enclosure integration remain to be verified.

FILES AND MAINTENANCE

A small, reproducible asset system.

logo-color.svg	Full lockup with role label
logo-compact-color.svg	Header/footer lockup without small role label
logo-*-mono / dark / reverse.svg	Explicit variants for different surfaces
symbol-color / mono / reverse.svg	Digital standalone symbols
symbol-20mm.svg	Dimensioned physical master
favicon.svg / icon PNGs / social.svg	Derived web and application assets

Source of truth

Each owning repository keeps branding/ with this guide, config.json, geometry.json and generate.py. Public site assets are generated from that source. Update both family copies together.

Rebuild

```
uv run --with fonttools python branding/generate.py
node branding/render.mjs
```
